PROFILE

UX/UI designer with a Master of Information (UX Design) from the University of Toronto and hands-on experience taking government web and mobile applications from research to build-ready prototypes. Combines user research, interaction and visual design with enough front-end skill to prototype in code and work closely with developers. Trilingual (English, Cantonese, Mandarin); Canadian, raised in Vancouver.

EXPERIENCE

UX/UI Engineer (acting project lead) — China Telecom Global, Hong Kong *Jul 2026 – Present*

- Lead UX research and interface design for five concurrent web and mobile applications for Hong Kong government departments (Transport Department, Fire Services Department), from stakeholder interviews and requirements to build-ready prototypes.
- Turn research into user flows, information architecture, wireframes and high-fidelity interfaces in Figma, then into build-ready HTML prototypes handed to React and Flutter developers; follow implementation through QA for pixel-level accuracy.
- Designed the data dashboards for a regulatory monitoring platform through several rounds of client feedback, reworking hierarchy and data visualization as requirements changed; the result drew strong commendation from the client.
- Build reusable Figma components and templates so screens across projects share one consistent system.
- Plan and run user acceptance testing across three groups; authored 218 structured test cases (98 pages) and turned results into prioritized fixes.

Localization & Creative Direction Associate (part-time) — Oak Smart Advertising Media Co. *2018 – 2025*

- As assistant creative director, coordinated trilingual (English, Cantonese, Mandarin) digital and offline campaigns for clients including China Unicom Hong Kong, from brief to delivery; adapted copy and visuals for each audience.

Teaching Assistant — University of Toronto Mississauga (CCT270) *2023 – 2024*

- Guided 12 student teams through playtests and Figma-based UX research projects in weekly tutorials; gave written feedback on 120+ research reports.

SELECTED PROJECTS

Difficulty Design Vault — Product design & build *2026*

- Designed and built a bilingual (English/Chinese) web knowledge base from my thesis research, covering information architecture, navigation, visual design and front-end build; now used in university course teaching.

Here Be Lions — Master's thesis research — University of Toronto *2025*

- Ran a mixed-method study (8 practitioner interviews, analysis of 590+ user comments, 35 comparative case studies) and synthesized the findings into a design framework.

Dive Down the Dungeon Deep — Project lead & core designer, 5-person team *2023*

- Led design and iteration through two rounds of playtesting with 36 participants, revising rules and layout based on observed user behaviour.

EDUCATION

Master of Information (UX Design; Culture & Technology) — University of Toronto *2025*

Bachelor of Arts, Communication, Culture, Information & Technology — UTM (joint with Sheridan College) *2023*

Certificate, Digital Communications — Sheridan College *2023*

SKILLS

Design: Figma (components, auto layout, interactive prototyping), wireframing, information architecture, user flows, visual hierarchy, data visualization, design systems

Research: interviews, usability and acceptance testing, journey mapping, qualitative analysis, synthesis

Build & tools: HTML, CSS, JavaScript, React and Flutter prototyping; Adobe Creative Cloud; AI-assisted design and prototyping (Claude, Codex, Cursor); Agile/Scrum, Jira, Git

Languages: English, Cantonese, Mandarin (native); Japanese (conversational)
